

“Creative Classroom Group”

Irene Pateraki

Summary

- Creative Classroom Community is made up of people who share a common purpose: to implement creativity into their eTwinning projects.
- Teachers will collaborate to draw on individual strengths, respect and actively promote learning opportunities.
- eTwinning teachers, who will be members in this community, will learn more about creative thinking, techniques, activities, games etc. It is expected to practice what they will have learnt in their classrooms and share their experience and knowledge with the others.

Background

- eTwinning projects are ideal means to promote student's creativity. Many teachers have already done a lot in this field. This community is created to support teachers towards this direction: implementing creativity in everyday teaching and eTwinning projects in an effective and professional way. Because it is a community, besides educational material that will be provided by the administrators, the participants will **share** material and examples of good practice that they have already used in their projects.

Goals

Participating in this community, teachers will be able to :

- share creative ideas
- foster creativity in their classes using different tools, methods, resources, etc.
- use ICT tools in order to make their projects more creative and attractive to their students
- plan and organize a project that promotes students' creativity
- put their creative ideas into practice
- learn from each other working with teachers from other countries

Goals

Participating in this community, teachers will be able to :

- share creative ideas
- foster creativity in their classes using different tools, methods, resources, etc.
- use ICT tools in order to make their projects more creative and attractive to their students
- plan and organize a project that promotes students' creativity
- put their creative ideas into practice
- learn from each other working with teachers from other countries

Goals

Participating in this community, teachers will be able to :

- share creative ideas
- foster creativity in their classes using different tools, methods, resources, etc.
- use ICT tools in order to make their projects more creative and attractive to their students
- plan and organize a project that promotes students' creativity
- put their creative ideas into practice
- learn from each other working with teachers from other countries

Sub-group roles

- The subgroup roles will be assigned according to members decisions.

roles, responsibilities will be:

- **Coordinator:** promotion of collaboration and facilitate the community development planning process, provide advice on development, monitoring and leadership to re-solve disputes.
- **Secretary:** write down the reports at the end of each unit and give the final text for the pedagogical guide.
Community members contribute for final goal according to the task allocation.

Time to work:

- Join the subgroup we are interested in
- Assign roles
- Discuss about creativity and take notices, make a presentation of what is creativity in our team and upload it. Find creative ways to present it!!!!
- Start organizing, proposing ideas, activities and implement them in your work
- Organize a plan, find partners, even in the group and present what you have done to the others
- Roles can change during the year

Just be creative!!!

Odd how the creative power at once brings the whole universe to order.

Virginia Woolf
